Dear Dr. Miura:

Subject: Negative Declaration for Acquisition of Kaihoku Place Pedestrian Beach Access Easement

We are forwarding for publication in the OEQC Bulletin a Negative Declaration and four copies of the Environmental Assessment for City acquisition of a public pedestrian easement over an existing privately owned road and beach right-of-way at Kaihoku Place. This action will assure continued public use of this beach right-of-way.

Sincerely,

January 24, 1990

Dr. Marvin T. Miura, Director Office of Environmental Quality Control State of Hawaii 465 South King Street, Room 104 Honolulu, Hawaii 96813

Dear Dr. Miura:

Subject:

Negative Declaration for the Proposed Land Acquisition for the Moanalua Earth Movement Area, Honolulu, Oahu, Hawaii TMK: 1-1-44

This letter constitutes a notice of Negative Declaration by the proposing agency after the subject action has been assessed according to Title 11, Chapter 200, Environmental Impact Statement Rules, and Chapter 343, HRS. The acquisition of certain improved parcels in the Moanalua Earth Movement area will involve the use of City funds. A determination has been made that an environmental impact statement is not required based on an environmental assessment which was prepared by the Department of Public Works. Four (4) copies of the environmental assessment are attached.

The pertinent information for this notice of determination is summarized below:

- 1. <u>Proposing Agency</u>. Department of Public Works, City and County of Honolulu, Hawaii.
- 2. <u>Description of the Proposed Action</u>. The proposed action is to acquire easements and lands in fee in the earth movement area in Moanalua, Honolulu, Hawaii, identified as Tax Map Key: 1-1-44 which will be utilized in the construction of improvements to alleviate the earth movement in the area. After construction is completed, the parcel will be regraded as needed.

The anticipated cost of land acquisition is estimated to be approximately \$800,000 and will be assumed by the City and County.

3. <u>Determination</u>. After completing an environmental assessment (and consulting with other agencies and individuals), we have determined that the proposed acquisition will not have significant impact on the environment, and an environmental impact statement is not required.

Dr. Marvin T. Miura Page 2 January 24, 1990

- Reasons Supporting the Determination. Reasons supporting the determination are based on the following criteria.
 - a. The proposed action will, indirectly, minimize social and economic impacts on the affected residents from the earth movement.
 - b. The proposal does not change the existing land uses and zonings. After acquisition, parcels may be used for construction of drainage, structural or other improvements or may be left vacant.
 - c. No rare or endangered wildlife exists in the affected area.
 - d. No archaeological or cultural sites will be affected by the proposed land acquisition.
 - e. There is no conflict with the State's long-term environmental policies, goals and guidelines.
- 5. <u>Contact Person:</u>

Dear Dr. Miura:

Subject: ENVIRONMENTAL ASSESSMENT AND NEGATIVE DECLARATION FOR THE ACQUISITION OF BANYAN STREET MANOR

We have reviewed the Environmental Assessment for the acquisition of the Banyan Street Manor and because we have determined that no significant environmental impacts are anticipated, we are filing a Negative Declaration.

The Banyan Street Manor is an existing low rent housing development with a federal Section 8 rent subsidy contract. The acquisition of the development is subject to the transfer of the subsidy contract, therefore no displacement of current tenants will be necessary as a result of this action.

The acquisition of the Banyan Street Manor by the Hawaii Housing Authority will ensure that the development will remain in the low rent housing supply, which is an objective of the State Housing Functional Plan of 1989.

Attached please find four (4) copies of the Environmental Assessment for the project as required by your office in compliance with EIS Regulation, Chapter 343, 1.31 C2, HRS.

We would appreciate publication of this Negative Declaration in your February 1990 newsletter.

If you should have any questions, please contact Mr. Michael Hee at 848-3273.

Sincerery,

MITSUO SHITO Executive Director

Dear Dr. Miura:

Subject:

Notice of Negative Declaration for the Reconstruction of Kawa Stream

Culvert

This letter is a Notice of Negative Declaration for the subject project pursuant to Chapter 343, HRS. The project involves the use of City funds and City lands. This notice of determination is based on an Environmental Assessment prepared by the Division of Engineering after consultation with other governmental agencies. Four (4) copies of the Negative Declaration are attached.

The pertinent data for this notice are as follows:

- 1. <u>Proposing Agency</u> Department of Public Works, City and County of Honolulu
- 2. <u>Proposed Action</u> The proposed project involves the replacement of the existing damaged, multi-barreled corrugated metal pipe (CMP) culvert crossing Kawa Stream approximately 375 feet downstream of Mokulele Drive with a single span reinforced concrete box culvert.

The crossing at the existing culvert was used by maintenance vehicles to gain access to the opposite bank during stream maintenance activities. At present,

Dr. Marvin T. Miura Page 2 February 14, 1990

vehicular access to the opposite bank is not possible and maintenance activities must be limited to work which may be done by hand.

The capacity of the existing multi-barreled culvert is inadequate for large storm runoffs and has resulted in the overtopping of and damage to the existing structure. The proposed 12'x7.5' box culvert will alleviate this problem.

- 3. <u>Determination</u> After assessing the potential environmental effects of the proposed project and consulting with other governmental agencies, we have determined that the project will not have significant impacts on the environment and an Environmental Impact Statement will not be prepared.
- 4. Reasons for Supporting the Determination Based on the criteria, the policies, guidelines, and provisions of Chapters 342, 343 and 344, HRS, the reason supporting the Negative Declaration Determination is that the proposed project will not:
 - affect rare or endangered species of flora or fauna.
 - affect any natural or cultural resources.
 - affect undeveloped lands.
 - conflict with existing land use and development plans.
 - have a significant long term effect on air quality, water quality or ambient noise levels.
 - displace any residences or businesses.
 - be located in close proximity to any known natural, historic, or archaeological sites.

Dear Mr. Clegg:

Subject: Negative Declaration

for the South Ramp Expansion Project

Honolulu International Airport

Honolulu, Hawaii

In conformance with Chapter 343, HRS, we are hereby filing our notice of determination for the South Ramp Expansion Project at the Honolulu International Airport. In accordance with the findings of the attached Environmental Assessment, we have determined that the Project will not create any significant adverse effects on the project area's environment. Moreover, it is anticipated that the implementation of the Project will enhance the overall airport environs by providing for more effective use of airport lands and by increasing efficiency of operations by airport uses.

In this regard, we have determined that an EIS for the Project will not be required. Should you have any questions regarding this Negative Declaration, please feel free to contact our project management consultants, Wilson Okamoto & Associates, Inc. at 531-5261 and ask for Mr. Ernest Takahashi.

Dr. Marvin T. Miura Director State Office of Environmental Quality Control 465 South King Street, Room 104 Honolulu, Hawaii 96813

Dear Dr. Miura:

Subject:

Notice of Determination/Negative Declaration Applicant Action by Oceanic Properties, Inc. Modification of Whitmore Village

Wastewater Treatment Plant
Whitmore Village, Oahu, Hawaii

On behalf of our client, Oceanic Properties, Inc., we are submitting this Notice of Determination/Negative Declaration for the Modification of Whitmore Village Wastewater Treatment Plant, Whitmore Village, Oahu, Hawaii, pursuant to Chapter 200, Subchapter 6, of the State Administrative Code (Sec. 11-200-9). This notice of determination/negative declaration is based on an environmental assessment prepared by our company, and consultation with the City Division of Wastewater Management, the State Department of Health, and other agencies and individuals. Four (4) copies of the environmental assessment are enclosed for your review. The pertinent data related to this notice are as follows:

PROPOSED PROJECT

The proposed project involves the treatment of all existing and anticipated wastewater flows from the Whitmore Village area (0.211 mgd) via the Whitmore Village WWTP. Four new clarifier tanks will be installed at Whitmore Village WWTP. City wastewater treatment plant operators at Whitmore Village WWTP will supplement the new plant equipment by incorporating the use of chemical polymers in the treatment process. The use of polymers would be made to facilitate the settleability of sludge in the treatment process. In a cumulative sense, the proposed facilities and modification in plant operations will be installed and made to accommodate an increased wastewater flow at Whitmore Village WWTP without increasing the mass emission rates of BOD and SS being discharged into Kaukonahua Stream.

Dr. Marvin T. Miura March 1, 1990 - 90-0466 Page 2

The cost of implementing this project is estimated to be approximately \$690,000. Almost half of this cost (\$340,000) will include the cost of procuring chemical polymer solution over a four-year period. The remaining \$350,000 will be used for the installation of new clarifiers within the Whitmore Village WWTP.

The City and County of Honolulu will incorporate the use of chemical polymers in the wastewater treatment process and bear the cost of the chemical feed system. Oceanic Properties, Inc. will install and bear the cost of installing all remaining plant modifications at Whitmore Village WWTP.

DETERMINATION

Based upon the review of the environmental assessment by the Division of Wastewater Management, we have determined the following:

- 1. This project will not generate any significant impacts upon the environment as the water quality and fish habitat of Wahiawa Reservoir and Kaukonahua Stream will not be adversely affected.
- 2. The significance of anticipated environmental impacts is adequately evaluated and disclosed within the environmental assessment.

Our office would appreciate your publishing of this determination as soon as possible, preferably in the March 8th issue of the OEQC Bulletin.

C. OF ENVIRONMEN --

March 8, 1990

Dr. Marvin T. Miura, Director Office of Environmental Quality Control State of Hawaii 465 South King Street, Room 104 Honolulu, Hawaii 96813

Dear Dr. Miura:

Subject: Negative Declaration for the Proposed

Wahiawa Corporation Yard Improvements, Wahiawa, Oahu, Hawaii

(Tax Map Key: 7-3-07: 02)

This letter constitutes a notice of determination by this department after The potential impact of the proposed project has been assessed according to Title II, Chapter 200, Environmental Impact Statement Rules, and Chapter 343 of the Hawaii Revised Statutes relating to the environmental impact statements. The determination has been made that an environmental statement is not required based on the environmental assessment (EA) that was prepared by the Department of Public Works.

The pertinent information for the notice of determination is summarized as follows:

1. Proposed Agency: Building Department

City and County of Honolulu

2. Land Owner: City and County of Honolulu

3. <u>Tax Map Key</u>: 7-3-07: 02

4. <u>Description of the Proposed Action</u>: The proposed action planned for the Wahiawa Corporation Yard consists of the construction of a new auto repair shop, equipment and vehicle covered parking sheds, installation of a new waste oil storage tank, security lighting and fencing around the baseyard perimeter, employee parkings, and asphalt concrete pavings.

The existing baseyard was initially constructed in the 1940's. Over the years, because of wear and tear, the existing facilities have been significantly deteriorated. To run an effective and efficient operation, repair and upgrade of the existing facilities became necessary. Furthermore, moderate expansion of the existing baseyard is needed to accommodate future population growth.

- 5. <u>Consultation</u>: Fifteen (15) Federal, State and City agencies, one (1) councilmember, one (1) neighborhood board, and two (2) utility companies were requested to review and comment on the EA. The letters of comments and responses prepared by the City are appended in the Appendix.
- 6. <u>Determination</u>: After completing an environmental assessment and consulting with other agencies and companies, we have determined that the proposed action will not have a significant impact on the environment, and an environmental impact statement is, therefore, not required.
- 7. Reason Supporting the Determination: The potential impact of the proposed project will not affect or involve significant impacts on the following criteria:
 - a. The loss or destruction of any natural or cultural resources (the proposed work is at an existing baseyard);
 - b. the curtailment of the range of beneficial uses of the environment;
 - c. affect a rare, threatened or endangered species, or its habitat;
 - d. substantially affect the economic or social welfare of the community or State (the baseyard provides essential public services to the community, thereby has a beneficial impact on social welfare;
 - e. involve a substantial degradation of environmental quality;
 - f. substantially affect public health;
 - g. substantially involve secondary impacts; such as, pollution changes or effects on public facilities;
 - h. detrimentally affect an environmentally sensitive area; such as, a flood plain, marsh, estuary, fresh water, or coastal water;
 - i. detrimentally affect air, or water quality, or ambient noise levels; and
 - j. affect natural or state historic sites.

Dr. Marvin T. Miura

March 6, 1990

In addition, none of the agencies who provided comments requested that an environmental impact statement be prepared.

Very truly yours,

HERBERT MURAOKA
Director and Building Superintendent

Dear Mr. Miura:

Subject: Environmental Assessment for Stephen F. Salsbury and Denise D. Salsbury for Access and Utility Easements at Waiohinu, Ka'u, Hawaii

Copies of the above-cited assessment were forwarded for our review and comments, detailed as follows:

Stephen F. Salsbury and Denise D. Salsbury

Direct sale of access and utility easements over and across a State road reserve situate at Waiohinu, Ka'u, Hawaii, identified by Tax Map Key:3rd/9-5-02:Kamikina Street Road Reserve.

As owner of the underlying lands, we have, as requested, reviewed said assessments. Please be advised that on the basis of the assessments, we find that the proposals will have no adverse impact on the environment.

This constitutes our filing a Negative Declaration for the above-cited project.

Dr. Marvin T. Miura Page 2

Please find enclosed for your consideration and action four copies of the Environmental Assessment with maps for the project.

For any questions to the foregoing, please contact our Land Management Division at 548-6460 or our Hawaii District Land Agent at 961-7245.

Dear Dr. Millia.

Subject: Fort Street Mall Reconstructed Sewers Honolulu, Hawaii, TMK: 2-1-2(13)

This letter is a Notice of Negative Declaration for the Fort Street Mall Reconstructed Sewers, Honolulu, Hawaii, pursuant to Chapter 343, HRS. The construction of the proposed project between Queen and Merchant Streets will involve the use of private funds and City lands. Should the project between Pauahi and Hotel Streets be required, the construction will involve the use of City funds and City lands. This notice of determination was based on an environmental assessment prepared by the Division of Wastewater Management and after consulting with other agencies and individuals. Four (4) copies of the Notice of Negative Declaration/Environmental Assessment are attached. The pertinent data for this notice are as follows:

- Proposing Agency Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The proposed projects consist of the installation of approximately 336 feet of 12-inch sewer mains and, if required, approximately 300 feet of 10-inch sewer mains along the Fort Street Mall between Queen and Merchant Streets, and between Pauahi and Hotel Streets, respectively. The proposed site is located in the Downtown, business area of Honolulu.

Environmental impacts are primarily short-term relating to construction activities which will interfere with normal pedestrian traffic. Moderate impact on business is expected from this project and construction activities must be controlled at the site to reduce impacts to the adjacent business establishments. Air quality and ambient noise level

may be affected during construction. Construction activities will impact on the underground utilities, especially gas. However, construction plans have been reviewed by the utility companies and coordination during construction with these companies will be required to minimize any utility disruptions.

The contractor will be required to mitigate the impacts during construction by following State and County regulations to controlling dust and noise, posting warning signs and covering or barricading trenches when required for safety.

Long-term impact will be the provision of adequate sewer capacity to accommodate existing and planned sewage flows for the Downtown Fort Street Mall area.

- 3. Determination After preparing an environmental assessment and consulting with other agencies and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement will not be prepared.
- 4. Reasons Supporting Determination Reasons and conclusion supporting the determination are based on the following criteria. The proposed project will not:
 - destroy any archaeological, historical or cultural resources;
 - directly affect any rare or endangered species, flora or fauna;
 - conflict with the State's environmental policies and goals expressed in Chapter 344, HRS;
 - affect the economic or social welfare of the community or state;
 - involve an environmentally sensitive area;
 - degrade environmental quality.

The proposed wastewater improvements will support planned developments designated on the Development Plan Land Use Map and is consistent with the Development Plan Public Facilities Map.

Dear Sir:

Re: Proposed Community Plan Amendment- Ka'ono'ulu Estates TMK:3-9-001:148&149, Kihei, Maui, HI

This matter arises from a request for an environmental assessment determination to support an application to amend the Kihei-Makena Community Plan. The proposed amendment would change certain lands from "Project District 4" to "Single family (SF)" and "Multi-family (MF)".

The Maui Planning Commission considered the matter at its regular meeting of April 24, 1990 and, based on the information contained in the Director's Report and Recommendation dated April 24, 1990 determined that as the community plan amendment did not result in a significant change to the intent of the existing Project District 4, a NEGATIVE DECLARATION was issued.

Should you require any further information, please do not hesitate to contact staff planner Brian Miskae.

Dr. Marvin Miura, Director Office of Environmental Quality Control State of Hawaii 465 South King Street, Rm. 104 Honolulu, Hawaii 96813

Dear Dr. Miura:

Subject: Draft Environmental Assessment for He'eia Wastewater Collection System He'eia, Koolaupoko, Oahu, Hawaii

The Department of Public Works, City and County of Honolulu proposes to construct permanent sewage facilities to replace three existing temporary sewage pump stations and force mains presently serving the He'eia Sewage Tributary Area. The temporary facilities are old, in poor structural condition, and do not comply with current wastewater facility design standards. The primary objective of the project is to enhance the health and safety of those served by the system by providing permanent wastewater facilities to effectively accommodate existing flows from the tributary area.

We believe the project may be of interest to you or to your organization and ask for your participation in assisting us to complete the Environmental Assessment prepared for the project. A copy of the draft Environmental Assessment is enclosed with this letter for your review. Presently, the information we have obtained indicates that the project does not have any significant impacts and a Negative Declaration may be filed.

We would appreciate receiving written comments on the proposed project relative to your jurisdiction, expertise, local knowledge, or interest. We would like to receive your comments by May 21, 1990 and hope that you can respond by that time. Thank you for your cooperation.

If you have any questions, please call Mr. Richard Leong at 527-5863.

Dr. Marvin Miura, Director Office of Environmental Quality Control 465 South King Street, #104 Honolulu, Hawaii 96813

Dear Dr. Miura:

Subject: Negative Declaration and Environmental Assessment for Hookipa Park Improvements

We respectfully submit four copies of the subject document for publication in the May 23, 1990 OEQC Bulletin as a Negative Declaration. The Department has determined that the proposed project will not have any significant environmental impacts and therefore an Environmental Impact Statement is not warranted. A list of reasons supporting this determination is included in the subject Environmental Assessment.

If you have any questions, please contact Masaru Abe of my staff at 243-7230.

very truly yours,

CHARMAINE M. TAVARES

Dear Dr. Miura:

Subject: Nimitz Highway Relief Sewer TMK: 1-5-32, 33, 34, 42

This letter is a Notice of Negative Declaration for the Nimitz Highway Relief Sewer, Honolulu, Hawaii, pursuant to Chapter 343, HRS. The construction of the proposed project between Libby Street and the Hart Street Wastewater Pump Station will involve the use of County funds and State lands. This notice of determination was based on an environmental assessment prepared by Calvin Kim and Associates, Inc. and Gerald Park, Urban Planner, after consulting with other agencies and individuals. Four (4) copies of the Notice of Negative Declaration are attached. The pertinent data for this notice are as follows:

- Proposing Agency Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The proposed project consists of installing approximately 2,700 lineal feet of new 36 and 42-inch sewer along Nimitz Highway between the Hart Street Wastewater Pump Station and Libby Street. In addition, a double barrel inverted siphon (20-inch pipe) will be installed under Kapalama Canal mauka of the Nimitz Highway Bridge.

Environmental impacts are primarily short-term relating to construction activities which will interfere with normal traffic. Construction activities may impact the underground utilities; however, construction plans will be submitted to the utility companies for review and approval prior to construction.

The contractor will be required to mitigate the impacts during construction by following State and County regulations on controlling dust and noise, posting warning signs and covering or barricading trenches when required for safety.

In the long term, the project would provide adequate sewer capacity to accommodate existing and projected needs in the tributary area.

- 3. Determination After preparing an environmental assessment and consulting with other agencies and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement will not be prepared.
- Reasons Supporting Determination Reasons and conditions supporting the determination are based on the following criteria. The proposed project will not:
 - destroy any archaeological, historical or cultural
 - resources; - directly affect any rare or endangered species, flora or
 - affect the economic or social welfare of the community or fauna;
 - degrade environmental quality;
 - conflict with the State's environmental policies and goals expressed in Chapter 344 HRS.

The proposed wastewater improvements will support planned developments designated on the Development Plan Land Use Map and is consistent with the Development Plan Public Facilities

June 25, 1990

Office of Environmental Quality Control TO:

Department of Water Supply, County of Maui FROM:

Notice of Determination SUBJECT:

Department of Water Supply Proposing Agency:

County of Maui

Department of Water Supply Accepting Agency:

County of Maui

The proposed action consists of (1) the Proposed Action: replacement of a 50,000 gallon redwood tank

with a 100,000 gallon glass-fused steel tank, (2) the installation of about 1,900 feet of a six-inch pipeline, and (3) the installation of

a booster pump station.

It is determined that an environmental impact Determination:

statement is not required. The 100,000 gallon tank, although forty-three feet high, will be equal in elevation with the existing 50,000 gallon tank; will be located in the same general area as the existing tank; will be located in a macadamia tree grove; and will be about 1,000 feet from the nearest residential structure. The pipeline will be constructed underground, along an existing dirt road. The booster pump station will be constructed at a site where there are existing three deepwell pumps and a 1.0 million gallon tank. Adverse effects will be limited to and will be

minimized during the construction period.

Dear Dr. Miura:

Subject: Grounds Maintenance/Storage Building

Honouliuli WWTP

Honouliuli, Ewa, Oahu, Hawaii TMK 9-1-12: 26 and 9-1-13: 7

This letter is a Notice of Negative Declaration for the Grounds Maintenance/Storage Building at Honouliuli Wastewater Treatment Plant, pursuant to Chapter 343, HRS. The construction of the proposed project will involve the use of City funds on government property. This notice of determination was based on an environmental assessment prepared by the Division of Wastewater Management and after consulting with other agencies and individuals. Four (4) copies of the Notice of Negative Declaration/ Environmental Assessment are attached. The pertinent data for this notice are as follows:

- 1. Proposing Agency Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The proposed project involves the construction of a Grounds Maintenance/Storage Building at the Honouliuli Wastewater Treatment Plant (WWTP) and will be located within the WWTP area adjacent to the existing maintenance building. There are no wetlands at or adjacent to the site. The proposed project consists of the following: (1) a 40 ft. by 60 ft. prefabricated metal building with corrosion resistant coating and with 3 roll-up doors approximately 14 feet in height; (2) an inner partition to separate grounds maintenance and general storage within the building; and (3) additional parking spaces for city/employee vehicles. Environmental impacts are primarily short-term relating to construction activities. Air quality and ambient noise level may be affected during construction.

June 25, 1990

The contractor will be required to mitigate the impacts during construction by following State and County regulations on safety, dust and noise.

Long-term impact will be the provision of a support facility necessary for more efficient operation and maintenance of the wastewater treatment plant. The proposed project will not have an adverse environmental impact at the plant or to the adjacent areas.

- 3. Determination After preparing an environmental assessment and consulting with other agencies and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement will not be prepared.
- 4. Reasons Supporting Determination Reasons and conclusion supporting the determination are based on the following criteria. The proposed project will not:
 - destroy any archaeological, historical or cultural resources;
 - directly affect any rare or endangered species, flora or fauna;
 - conflict with the State's environmental policies and goals expressed in Chapter 344, HRS;
 - affect the economic or social welfare of the community or state;
 - involve an environmentally sensitive area;
 - degrade environmental quality.

The proposed wastewater improvement will improve plant personnel working conditions and their welfare and morale and reduce potential for accidents to maintenance and supply personnel due to restrictive working space.

RECEIVE

June 25, 1990

Dr. Marvin Miura Director State Office of Environmental Quality Control 465 South King Street, Room 104 Honolulu, Hawaii 96813

Dear Dr. Miura:

SUBJECT: NOTICE OF DETERMINATION/NEGATIVE DECLARATION

AGENCY ACTION BY COUNTY OF KAUAI, DEPARTMENT OF PUBLIC WORKS KAPAA SEWER PROJECT, PHASE I

WAILUA-KAPAA AREA, KAPAA, HAWAII

Back in February 1985, we submitted an Environmental Assessment with a Negative Declaration for the subject project which involves the construction of an interceptor/collector sewer line, including pump stations from Kapaa Town to Wailua.

While the scope of the project has not changed, the alignments of the proposed force mains needed to be relocated from the State Highway Bridges to underwater canal crossings.

This change in alignment, more specifically the need to work within the respective canals, prompted the preparation of the enclosed (three copies) environmental assessment for the subject project. We again have determined a Negative Declaration based on the following:

- 1. This project will not generate any significant impacts upon the environment.
- 2. The significance of anticipated environmental impacts is adequately evaluated and disclosed within the environmental assessment.

A description of the proposed action and statement of objective is summarized in Chapter Two of the environmental assessment (see Project Alternative B). A description of the affected environment, related maps and other required information are presented in Chapter Three of the environmental assessment.

Dr. Marvin Miura June 25, 1990 Page (2) RECEIVE

90 JUN 28 A11:03

We would appreciate your publishing of this determination as soon as possible as we are the with a compliance schedule with EPA to initiate and complete complete complete contact of the project.

Should you have any questions concerning our determination require or further information, please contact Mr. Harry Funamura, Chief of Sewers Section at Telephone No. (808) 245-4751.

Thank you for your time and consideration.

Dear Dr. Miura:

Subject: Nanakai Trunk Sewer

Ewa, Cahu, Hawaii

TMK: 9-1-15: POR. 4 and 9-2-18: 2

This letter is a Notice of Negative Declaration for the Nanakai Trunk Sewer, Ewa, Cahu, Hawaii, pursuant to Chapter 343, HRS. The construction of the proposed project will involve the use of City funds on land to be dedicated to the City. This notice of determination was based on an environmental assessment prepared by the Division of Wastewater Management and after consulting with other agencies. Four (4) copies of the Notice of Negative Declaration/Environmental Assessment are attached. The pertinent data for this notice are as follows:

- 1. Proposing Agency Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The proposed project consists of the installation of approximately 625 feet of 10-inch gravity sewers from the Nanakai Wastewater Treatment Plant to an existing sewer manhole constructed as part of the privately developed West Beach Resort, Phase IIB project.

Environmental impacts are primarily short-term relating to construction activities. Air quality and ambient noise level may be affected during construction. Construction plans will be reviewed by the utility companies for coordination.

The contractor will be required to mitigate the impacts during construction by following State and County regulations to controlling dust and noise, posting warning signs and covering or barricading trenches when required for safety.

Long-term impact will be the removal of a wastewater treatment plant and its environmental problems from the residential subdivision and the effective diversion of sewage flows from the Nanakai Garden/Honokai Hale subdivision to the Honouliuli WWTP.

- 3. Determination After preparing an environmental assessment and consulting with other agencies and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement will not be prepared.
- 4. Reasons Supporting Determination Reasons and conclusion supporting the determination are based on the following criteria. The proposed project will not:
 - destroy any archaeological, historical or cultural resources;
 - directly affect any rare or endangered species, flora or fauna;
 - conflict with the State's environmental policies and goals expressed in Chapter 344, HRS;
 - affect the economic or social welfare of the community or state;
 - involve an environmentally sensitive area;
 - degrade environmental quality

The proposed wastewater improvements will support planned developments designated on the Development Plan Land Use Map and is consistent with the Development Plan Public Facilities Map.

Dear Sir:

SUBJECT: Negative Declaration for Proposed Acquisition of Campbell Estate Lands, East Kapolei, Honouliuli, Ewa, Oahu, TMK: 9-1-16: por 25 and TMK: 9-1-17:

por 4

Enclosed are four (4) copies of an Environmental Assessment for the State of Hawaii's proposed acquisition of the Campbell Estate lands located at East Kapolei, Honouliuli, Ewa, Oahu.

Based on the assessment, we have concluded that the proposed acquisition will not have any significant environmental effects and therefore does not require the preparation of an environmental impact statement.

We also enclose a copy of the OEQC form for publication in the OEQC Bulletin.

Please call Sojin Serikaku of our Land Management office at 8-6460 if there are any questions.

NEGATIVE DECLARATION FOR THE PROPOSED KALIHI STREET IMPROVEMENTS NIMITZ HIGHWAY TO DILLINGHAM BOULEVARD

A. PROPOSING AGENCY

Highways Division, Department of Transportation, State of Hawaii

B. ACCEPTING AUTHORITY

Director, Department of Transportation, State of Hawaii

C. DESCRIPTION OF PROPOSED ACTION

The proposed action consists of the construction of improvements related to the widening of Kalihi Street from two traffic lanes to four traffic lanes between Nimitz Highway and Dillingham Boulevard. The project site, located in the Kalihi area and contained within Tax Map Keys 1-2-03, 1-2-04, 1-2-05 and 1-5-28 measures approximately 1,200 lineal feet. Improvements generally include asphaltic concrete paving, curbs, gutters, sidewalks, driveways, wheelchair ramps, drainage facilities, lighting, signing, striping, a new traffic signal at the intersection of Kalihi and Kalani Streets, and relocations of existing utilities.

This portion of Kalihi Street is the only remaining portion utilizing two lanes. All of Kalihi Street makai of Nimitz Highway, and mauka of Dillingham Boulevard up to School Street is already widened to four lanes in accordance with the State's designation of Kalihi Street as a major thoroughfare leading to and leaving from the Interstate H-1 Freeway and Likelike Highway.

D. <u>DETERMINATION</u>

The proposed action will not have a significant effect on the environment.

Office of Environmental Quality Control State of Hawaii 465 S. King Street, Room 104 Honolulu, Hawaii 96813

Attention: Mr. Abdul Salau

Gentlemen:

Subject: Heeia Wastewater Collection System

Heeia, Koolaupoko, Oahu, Hawaii

TMK 4-6-04: 07, 08, 16, 18, 19, 20, 22, 23

Pursuant to Chapter 343, HRS, the Department of Public Works, City and County of Honolulu is submitting a Notice of Negative Declaration for Heeia Waste-water Collection System (Alii Bluff WWPS and FM and Punawai WWPS and FM). The construction of the proposed project will involve the use of City land and funds. This notice of determination was based on findings reported in an Environmental Assessment prepared by Calvin Kim & Associates, Inc. and Gerald Park Urban Planner for the Division of Wastewater Management and after consulting with other government agencies, community organizations, and individuals. Four (4) copics of the Notice of Negative Declaration/ Environmental Assessment are attached. The pertinent data for this notice are as follows:

- 1. Proposing Agency Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The primary objective of the project is to enhance the health and safety of the public by providing permanent wastewater facilities to effectively handle existing and planned wastewater flows from the Heeia Tributary Area. Three temporary sewage pump stations and their respective force mains will be replaced by permanent wastewater facilities. Two new wastewater pump stations will be constructed on sites now occupied by the Crown Terrace SPS No. 2 at the end of Halaulani Street and the Alii Bluffs SPS adjacent to Kamehameha Highway near Heeia Bridge.

Land required for expansion at the existing pump station sites will be provided by the Bishop Estate. The new pump stations will be constructed on previously filled land and will not affect the adjacent Heeia Marsh. Alignment corridors for new force mains will be located within the right-of-way of Kamehameha Highway and Halaulani Street. The cost of the project is estimated at \$4,413,000.

Environmental impacts are primarily short-term relating to construction activities. Air quality, ambient noise levels, and traffic circulation along Kamehameha Highway and Halaulani Street may be affected during construction. Construction activities also may affect underground utilities. However, construction plans will be submitted for review by utility companies and coordination during construction with these companies will be required to minimize any utility disruptions.

The contractor will be required to mitigate impacts during construction by adhering to State and County regulations for controlling noise and dust, posting warning signs to alert motorists and pedestrians of roadwork, covering or barricading trenches during non-working hours, and posting safety devices (and signs) at all times.

The primary long-term impact will be the provision of adequate sewer capacity to accommodate existing and planned sewage flows within the Heeia Tributary Area.

- 3. Determination After reviewing the Environmental Assessment prepared for the project and consulting with other government agencies, community organizations, and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement is not required.
- 4. Reasons Supporting Determination Reasons and conclusion supporting the determination are based on the following criteria. The proposed project will not:
 - destroy any archaeological, historical or cultural resources;
 - affect any rare or endangered flora or fauna species and its habitat;
 - conflict with the State's environmental policies and goals expressed in Chapter 344, HRS;
 - adversely affect the economic or social welfare of the community or
 - affect an environmentally sensitive area;
 - degrade environmental quality;
 - involve a commitment for a larger action.

Kaupulehu Developments and Kona Village Associates c/o Gray, Hong, Bills & Associates 119 Merchant Street, Suite 607 Honolulu, Hawaii 96813

Gentlemen:

NOTICE OF ACCEPTANCE AND ENVIRONMENTAL DETERMINATION Conservation District Use Application

This acknowledges the receipt and acceptance for processing your application for an access easement at Kaupulehu, North Kona, Hawaii.

According to your application, you propose to build an approximately 8,000 feet long, 20 feet wide, paved roadway from Queen Kaahumanu Highway to the Kona Village Resort over a 60 feet wide easement leased from the Bishop Trust Estate. The roadway will replace an existing access road scheduled for removal because of a golf course development. The roadway will have a 6 inch base course and 5 foot wide crushed lava shoulders. The roadway will contain no utilities. A guardhouse will be constructed at the beginning of the new access road and will have utilities such as electricity, telephone, water, and individual wastewater system.

After reviewing the application, we find that:

- The proposed use is a conditional use within the General subzone of the Conservation District according to Administrative Rules, Title 13, Chapter 2, as amended;
- 2. A public hearing pursuant to Section 183-41, <u>Hawaii</u>

 <u>Revised Statutes</u> (HRS), as amended, is required in that the proposed use is of a commercial nature; and

3. In conformance with Title 11, Chapter 200, of the Administrative Rules, a negative declaration was determined for the proposed action.

As the applicant, please be advised that it will be your responsibility to comply with the provisions of Section 205A-29(b), Hawaii Revised Statutes, relating to Interim Coastal Zone Management (Special Management Area) requirements.

Negative action as required by law, on your application by the Board of Land and Natural Resources can be expected should you fail to obtain from the County thirty (30) days prior to the 180-day expiration date, as noted on the first page of this notice, one of the following:

- 1. A determination that the proposed development is outside the Special Management Area (SMA);
- A determination that the proposed development is exempt from the provisions of the county ordinance and/or regulation specific to Section 205A-29(b), HRS; or
- A Special Management Area (SMA) permit for the proposed development.

Pending action on your application by the Land Board in the near future, your cooperation and early response to the matters presented herein will be appreciated. Should you have any questions, sented here to contact our Office of Conservation and Environmental Affairs staff at 548-7837.

Gentlemen:

Subject:

Waimano Home Road Reconstructed Sewer TMK: 9-7-20 to 22, 24, 32, 33 and 35

This letter is a Notice of Negative Declaration for the Waimano Home Road Reconstructed Sewer, Pearl City, Hawaii, pursuant to Chapter 343, HRS. The construction of the proposed project between Noelani Street and the Pearl City Wastewater Pump Station will involve the use of City funds. This notice of determination was based on an environmental assessment prepared by Gray, Hong, Bills and Associates, Inc., after consulting with other agencies and individuals. Four (4) copies of the Final Environmental Assessment are attached. The pertinent data for this notice are as follows:

- 1. <u>Proposing Agency</u> Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The proposed project consists of installing approximately 6,000 lineal feet of 18 to 24-inch sewer lines along Waimano Home Road between Noelani Street and the Pearl City Wastewater Pump Station.

Environmental impacts are primarily short-term relating to construction activities which will interfere with normal traffic. Air quality, ambient noise levels, and traffic circulation along Waimano Home Road, Lehua Avenue, Road "A", Hugh Street and Kamehameha Highway may be affected during construction. Construction activities may impact the underground utilities; however, construction plans will be submitted to the utility companies for review and approval prior to construction.

The contractor will be required to mitigate the impacts during construction by following State and County regulations on controlling dust and noise, posting warning signs and covering or barricading trenches when required for safety.

In the long term, the project would provide adequate sewer capacity for the tributary area to support the City's Development Plan.

3. <u>Determination</u> - After reviewing the Environmental Assessment prepared for the project and consulting with other government agencies, community organizations and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement is not required.

Office of Environmental Quality Control Page 2 August 29, 1990

- Reasons Supporting Determination Reasons and conditions supporting the determination are based on the following criteria. The proposed project will not:

 - destroy any archaeological, historical or cultural resources;
 affect any rare or endangered flora or fauna species and its habitat;
 degrade environment quality;
 conflict with the State's environmental policies and goals expressed in Chapter 344, HRS.

Attention: Mr. Brian Choy

Dear Dr. Anderson:

Subject: Notice of Determination for the

Laumaka Work Release Center Improvements

Proposing Agency: Department of Accounting and General Services

Accepting Authority: Department of Accounting and General Services

Och Consistent Center. Facilities

The Department of Accounting and General Services, after having reviewed the environmental assessment which examined the environmental impacts of the above named project, has concluded that there will not be any long-term adverse impacts to the environment and, therefore, has determined that an environmental impact statement is not required.

Proposing Action

Proposed is the redevelopment of the Laumaka Work Release Center as part of the Oahu Community Correctional Center (OCCC) complex master plan to mitigate substandard and inefficient facilities. The Laumaka Work Release Center will be reconstructed to expand its bed capacity from 15 to 96 to better serve inmates towards their successful re-integration back into society. The proposed improvements are designed, in part, to meet the requirements set by the October, 1985, Consent Decree regarding confinement conditions at the OCCC.

A central theme of the improvement program is the construction of as many beds as possible in as short a time period as possible while staying within budgetary limits.

Dr. Marvin T. Miura Letter No. PM-1389.0 Page 2

Determination and Supporting Reasons

The Negative Declaration is formed on the basis that the proposed action will not result in loss or destruction of natural or cultural resources, will not adversely affect public health or the social or economic welfare of the community, County or State, and will conform with future plans and policies of the City and County of Honolulu and the State of Hawaii.

The proposed action will result in short-term construction impacts which will be mitigated by the utilization of sound and approved construction practices.

For further information regarding the proposed action, contact Mr. Norman Sahara, Project Management Branch, Department of Accounting and General Services, P. O. Box 119, Honolulu, Hawaii 96810, telephone (808)548-4561.

Very truly yours,

Gentlemen:

Subject: Whitmore Village WWTP Diversion System TMK: 7-01-02

This letter is a Notice of Negative Declaration for the Whitmore Village WWTP Diversion System, Wahiawa, Hawaii, pursuant to Chapter 343, HRS. City funds will be used to construct the project between Whitmore Village and Kilani Avenue. This notice of determination was based on an environmental assessment prepared by Kwock Associates, Inc., after consulting with other agencies and individuals. Four (4) copies of the Final Environmental Assessment are attached. The pertinent data for this notice are as follows.

- 1. <u>Proposing Agency</u> Department of Public Works, City and County of Honolulu.
- 2. Proposed Action The proposed project consists of constructing a diversion system within the Whitmore Avenue and Kamehameha Highway rights-of-way to permit the centralized treatment of wastewater in the Wahiawa area. The diversion system will begin at Ihiihi Street and end at Kilani Avenue. A 15-inch gravity system will be installed between Ihiihi Street and the Karsten Thot Bridge and an 8 and 10-inch siphon will be constructed from the bridge to Kilani Avenue. The project follows the recommendation of the Whitmore Village Small Community Facility Plan to centralize treatment at Wahiawa when the flows to the Whitmore Village WWTP approaches the existing design flow of 0.20 mgd. Environmental impacts are primarily short-term relating to construction activities which will interfere with

normal traffic. Air quality, ambient noise levels and traffic circulation along Whitmore Avenue, Kamehameha Highway and Kilani Avenue may be affected during construction. Construction plans will be submitted to the utility companies for review and approval prior to construction to avoid conflict with underground utilities.

In the long term, the project would provide adequate sewer capacity for the tributary area to support the City's Development Plan. The project will also eliminate the Whitmore Village Wastewater Treatment Plant and potential odors.

- <u>Determination</u> After reviewing the Environmental Assessment prepared for the project and consulting with other government agencies, community organizations and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement is not required.
- <u>Reasons Supporting Determination</u> Reasons and conditions supporting the determination are based on the following criteria. The proposed project will not:
 - affect any rare or endangered flora or fauna;
 - destroy any archaeological, historical or cultural resources;
 - displace any families or commercial establishments
 - degrade environmental quality;
 - conflict with the State's environmental policies and goals expressed in Chapter 344, HRS.
- 5. <u>Contact Person</u> Jay Hamai

Dear Dr. Anderson:

c:

Job No. 63-HQ-3, Baitfish Holding and Transfer Facility, Waiakea, South Hilo, Hawaii

We would like to amend our Environmental Assessment and Notice of Determination (Negative Declaration) dated June 1990 for the subject project to include the delivery and installation of three fiberglass tanks to the facility. We do not believe there to be any adverse environmental impacts apart from the general constructionrelated, short-term impacts which will be mitigated by normal construction practices.

Each tank will be 12 feet in diameter and 40 inches tall. The estimated cost for this portion of the project is \$13,400 and all work should be completed within 180 days.

Enclosed are four (4) copies of the site plan for the three holding tanks which are covered in Job No. 63-HQ-3A.

Your favorable consideration of this request will be greatly appreciated. Should you have any questions on this matter, please feel free to have your staff contact Mr. Gordon Akita of the Planning Branch at Extension-8-7496.

Sincerely,

MANABU TAGOMORI Manager-Chief Engineer

IN REPLY REFER TO:

R 90-1103

Bruce Anderson, Ph.D.
Deputy Director for Environmental Health
Department of Health
P. O. Box 3378
Honolulu, Hawaii 96801

Dear Dr. Anderson:

Subject:

Negative Declaration for the Proposed

Wahiawa Refuse Convenience Center, Wahiawa, Oahu, Hawaii

Tax Map Key: 7-01-01:22 (POR.)

This letter constitutes a notice of determination by this department after the potential impact of the proposed project has been assessed according to Title II, Chapter 200, Environmental Impact Statement Rules, and Chapter 343 of the Hawaii Revised Statutes relating to environmental impact statements. The determination has been made that an environmental impact statement is not required, based on the environmental assessment (EA) that was prepared by our department through our contract with Engineering Design Group, Inc.

The pertinent information for the notice of determination is summarized as follows:

- Proposing Agency:

 Department of Public Works
 Division of Refuse Collection and Disposal
 City and County of Honolulu
- Land Owner:
 City and County of Honolulu
- 3. <u>Tax Map Key</u>: 7-01-01:22 (POR.)

Dr. Bruce Anderson October 1, 1990 Page 2

4. Description of the Proposed Action:

The proposed action planned for the Wahiawa Refuse Convenience Center consists of a drive-through system where a resident may drive up to a disposal container, deposit refuse, and depart. Access to the site will be provided by a 24-foot roadway from Wilikina Drive. Vehicles will continue to the paved area around disposal bins or to the recycling area, as determined by the guard at the site.

This convenience center does not replace regular residential waste collection. Rather, it is intended to be a convenient place where a resident may dispose of refuse items which the resident might ordinarily have to transport to a sanitary landfill. Hazardous materials will not be accepted at the site. Deposited material will be compacted directly into the haul container which when full will be hauled to H-POWER. Non-combustible items will be transported directly to the Waimanalo Gulch Sanitary Landfill for disposal.

5. <u>Consultation</u>:

Twelve (12) Federal, State and City agencies, one (1) councilmember one (1) neighborhood board, and three (3) private organizations were requested to review and comment on the EA. The comments received within the review period are contained in Section IX of the EA. The comments did not require major changes and involved coordination already incorporated in the construction process.

Subsequent to the deadline for the review period and after the EA has finalized, the comments from the Department of Health were received. Those comments and our response are attached. As presented in the response letter, precautions will be taken in the design to mitigate potential impacts presented in the letter.

6. <u>Determination</u>: After completing the environmental assessment and consulting with other agencies and companies we have determined that the proposed action will not have a significant impact on the environment, and an environmental impact statement is not required.

Dr. Bruce Anderson October 1, 1990 Page 3

- Reasons Supporting the Determination: The potential impact of the 7. proposed project will not affect or involve significant impacts on the following criteria:
 - the loss or destruction of any natural or cultural resources; a.
 - the curtailment of the range of beneficial uses of the environment; b.
 - affect a rare, threatened or endangered species, or its habitat; c.
 - substantially affect the economic or social welfare of the d. community or State;
 - involve a substantial degradation of environmental quality; e.
 - substantially affect public health; f.
 - substantially involve secondary impacts, such as pollution changes g. or effects on public facilities;
 - detrimentally affect an environmentally sensitive area, such as a h. flood plain, marsh, estuary, fresh water, or coast water;
 - detrimentally affect air, or water quality, or ambient noise levels; i. and
 - affect natural or state historic sites. j.

In addition, none of the agencies which provided comments requested that an environmental impact statement be prepared.

Sincerely,

C. Michael Street

MEMORANDUM

Office of Environmental Quality Control TO:

FROM: William W. Paty, Chairperson

Board of Land and Natural Resources

SUBJECT: Conservation District Use Application for a Multiple-point Boat Mooring System at Molokin Shoal, Maui

The above-mentioned Chapter 343 Document was reviewed and a negative declaration was declared based upon the environmental assessment provided with the CDUA.

Please feel free to call me or Jay Lembeck of our Office of Conservation and Environmental Affairs, at 8-7837, if you have any questions.

Attachment

Negative action as required by law, on your application by the Board of Land and Natural Resources can be expected should you fail to obtain from the County thirty (30) days prior to the 180-day expiration date, as noted on the first page of this notice, one of the following:

- A determination that the proposed development is outside the Special Management Area (SMA);
- 2. A determination that the proposed development is exempt from the provisions of the county ordinance and/or regulation specific to Section 205A-29(b), HRS; or
- A Special Management Area (SMA) permit for the proposed development.

Pending action on your application by the Land Board in the near future, your cooperation and early response to the matters presented herein will be appreciated. Should you have any questions, feel free to contact our Office of Conservation and Environmental Affairs staff at 548-7837.

Very truly yours,

WILLIAM W. PATY

Gentlemen:

Subject: Environmental Assessment for M. Sonomura Contracting Company, Inc. for mining purposes at Waiakea, South Hilo, Hawaii

Copies of the above-cited assessment were forwarded for our review and comment, detailed as follows:

M. Sonomura Contracting Company, Inc.

Direct issuance of land license for mining purposes over portion of Parcel II of the Tax Map Key 3rd/2-1-13, Waiakea, South Hilo, Hawaii.

As owner of the underlying lands, we have, as requested, reviewed said assessments. Please be advised that on the basis of the assessments, we find that the proposals will have no adverse impact on the environment.

This constitutes our filing a Negative Declaration for the above-cited project.

Office of Environmental
Quality Control
Page 2

Please find enclosed for your consideration and action four copies of the Environmental Assessment with maps for the project.

For any questions to the foregoing, please contact our Division of Land Management, Hawaii District Office at 933-4245.

Mr. Bruce Anderson, Acting Director Office of Environmental Quality Control 465 S. King Street, #104 Honolulu, Hawaii 96813-2910 OFC. OF ENVIRONMENT OUT OF THE CONTENT OF THE CONTE

Dear Mr. Anderson:

Re: Notice of Determination

Mr. B. Martin Luna, on behalf of Lanai Resort Partners, requesting an Environmental Assessment Determination for an Amendment to the Lanai Community Plan and Manele Project District Ordinance and Amendment to the existing Project District boundary by 160 acres for construction of a Golf Course, Tmk: 4-9-02: por. 1, Manele, Lanai.

Please find attached the Notice of Determination and four (4) copies of the environmental assessment relative to the subject matter. The Maui Planning Commission at its October 30, 1990 meeting determined a Negative Declaration for the proposed project.

Should you have any questions on this matter, please contact Mr. Philip Ohta of my staff.

Very truly yours,

CHRISTOPHER L. HART Planning Director

OFC. OF ENVIRONCE A GUALITY CONTROL

ACCEPTING AUTHORITY: Maui Planning Commission

Planning Department 250 South High Street Wailuku, Hawaii 96793

DESCRIPTION OF PROPOSED PROPERTY: The applicant is requesting an Amendment to the Lanai Community Plan and Manele Project District Ordinance and Amendment to the existing Project District boundary by including 120 acres from the State Rural District and 40 acres from the State Agricultural District identified by TMK: 4-9-02: por. 1, Manele, Lanai. The applicant intends to construct a golf course and clubhouse within this expanded area and within the existing Manele Project District.

DETERMINATION: The Maui Planning Commission at its meeting on October 30, 1990, determined a Negative Declaration for the proposed action. This decision supercedes the original Environmental Assessment Determination conducted by the Maui Planning Commission on May 22, 1990, where an Environmental Impact Statement was required.

REASONS SUPPORTING DETERMINATION: The Maui Planning Commission in review of the proposed project concluded that the proposed action would not have significant effects on the environment in accordance with the provisions of Chapter 343, Hawaii Revised Statutes, and Environmental Impact Statement Rules of the Department of Health, State of Hawaii.

Dr. Bruce Anderson Acting Interim Director Office of Environmental Quality Control 465 South King Street, Room 115 Honolulu, Hawaii 96813

Attention: Mr. Brian Choy

Dear Dr. Anderson:

Notice of Determination for the Subject:

Oahu Community Correctional Center Improvements

Proposing Agency: Department of Accounting

and General Services

Department of Accounting Accepting Authority: and General Services

The Department of Accounting and General Services, after having reviewed the environmental assessment which examined the environmental impacts of the above named project, has concluded that there will not be any long-term adverse impacts to the environment and, therefore, has determined that an environmental impact statement is not required. Four (4) copies of the environmental assessment prepared for this project are enclosed.

Proposed Action

Proposed is the renovation, replacement and construction of improvements at the Oahu Community Correctional Center (OCCC) complex as masterplanned to mitigate substandard and inefficient facilities. The proposed improvements are designed, in part, to meet the requirements set by the October 1985 Consent Decree regarding confinement conditions at the OCCC.

Dear Sir:

SUBJECT: Negative Declaration -- Kohanaiki Resort Off-Site

Infrastructure

Kau/Ooma 2, North Kona, Hawaii

TMK: 7-2-5: 1; 7-3-9: 5

We must object to this Negative Declaration, published in the November 8, 1990, OEQC Bulletin.

The applicant's corridors for utilities include historic sites. The applicant stated that roads and utilities could be moved about within the corridors to avoid these sites. The initial archaeological survey was not complete enough to evaluate this claim. The applicant was to plot site sizes on a map and show the roads and utilities would avoid the sites. We have yet to receive such a map.

Until we can confirm that historic sites will be avoided -- or alternatively, that significant sites are properly inventoried and acceptable mitigation plans agreed to -- we must conclude that the project may have an adverse impact.

We expect that this problem will be resolved before too long, but as of yet, it is not.

Sincerely,

DON HIBBARD, Director

Historic Preservation Program

Gentlemen:

Subject:

Akumu Street Relief Sewer, Enchanted Lake Estates

TMK: 4-2-50

This letter is a Notice of Negative Declaration for the Akumu Street Relief Sewer, Enchanted Lake Estates, Kailua, Hawaii, pursuant to Chapter 343, HRS. City funds will be used to construct this project between the Enchanted Lake Estates Wastewater Pump Station (on Akumu Street) to Keolu Drive. notice of determination was based on an environmental assessment prepared by Smith, Young & Associates, Inc., after consulting with other agencies and individuals. Four (4) copies of the Final Environmental Assessment are attached. The pertinent data for this notice are as follows:

- Proposing Agency Department of Public Works, City and County of Honolulu.
- Proposed Action The proposed project consists of constructing a new force main from the Enchanted Lake Estates Wastewater Pump Station to the Keolu Drive trunk sewer. This will require approximately 1800 linear feet of 10-inch pipe and a new manhole constructed in Keolu Drive. A portion of the existing gravity sewer that serves Akumu Street (between the pump station and Akalei Place) will be replaced with a new 10-inch gravity sewer. The existing pumps and standby generator at the pump station will be replaced.

The objective of the project is to stop sewage overflows within the Akumu Street Area. Environmental Office of Environmental Quality Control Page 2 November 23, 1990

impacts are primarily short term. Construction activities will partially interfere with normal vehicular traffic. Air quality, ambient noise levels and traffic flow primarily along Akumu Street and to a lesser degree, Keolu Drive may be affected during construction. Construction plans will be submitted to the utility companies for review and approval prior to construction to avoid conflicts with underground utilities.

The primary long term impact will be the prevention of future sewage overflows from the existing force main at the Enchanted Lake Wastewater Pump Station and the sewer manholes on Akumu Street.

- 3. <u>Determination</u> After reviewing the Environmental Assessment prepared for the project and consulting with other government agencies and community organizations, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement is not required.
- 4. Reasons for Supporting the Determination The following findings and reasons support the determination that there will be no significant effect on the environment as a result of this project:
 - Construction will be limited to the right-of-way of Akumu Street, Keolu Drive and the Enchanted Lake Estates WWTP.
 - The proposed action will not detrimentally impact the aesthetics of the area.
 - All impacts associated with the construction are short-term and temporary.
 - No rare or endangered wildlife or flora exists in the construction area.
 - No known archaeological, historical or cultural sites exist in the area.
 - The proposed project will eliminate sewage overflows.
 - The proposed project will satisfy the Consent Agreement, Docket No. 89-CW-EOW-3, Consent

Office of Environmental Quality Control Page 3 November 23, 1990

> Agreement Exhibit "A", entered into by and between the Department of Health, State of Hawaii, complainant, and the City and County of Honolulu, (Enchanted Lake Sewage Pump Station) respondent dated April 27, 1990.

Gentlemen:

This letter is a Notice of Negative Declaration for the Kamehameha Highway Force Main Replacement, Honolulu, Hawaii, pursuant to Chapter 343, HRS. This notice of determination was based on an environmental assessment prepared by Belt Collins & Associates, after consulting with other agencies and individuals. Four (4) copies of the Final Environmental Assessment are attached. The pertinent data for this notice are as follows.

- 1. <u>Proposing Agency</u> Department of Public Works, City and County of Honolulu.
- 2. <u>Proposed Action</u> The proposed project consists of constructing a replacement force main along Nimitz Highway adjacent to Keehi Lagoon.

The existing force main is about 30 years old (installed in 1959) and has been subjected to extreme corrosion. The proposed project is intended to remedy the pipeline's existing state of disrepair and bring it back to its normal operating condition.

The project site is located approximately 1,500 feet east of the Honolulu International Airport near the Keehi Interchange. Nimitz Highway is located to the north of the project site, Sand Island Industrial Complex to the east, Keehi Lagoon to the south and Keehi Lagoon Beach Park to the west. Moanalua Stream and Kalihi Stream, two major drainageways, traverse the project site at two separate locations.

The project site encompasses an area of approximately 3.3 acres which includes an approximately 50-foot wide area along the approximately 2,880-foot long force main alignment and is identified by the following Tax Map Key designations:

TMK: First Division, 1-1-03: portions of 3, 4, 7, 28 and 138

TMK: First Division, 1-2-21: portions of 35 and 36

The new force main will consist of a 42-inch diameter reinforced concrete low head pressure pipe buried a minimum of about 4 feet (to crown of pipe) beneath the surface of the ground. For the force main to cross Moanalua and Kalihi Streams, either concrete bridges or understream crossings will be used. If concrete bridges are used, they will be similar to the adjacent existing pedestrian bridges.

- 3. **Determination** - After reviewing the Environmental Assessment prepared for the project and consulting with other government agencies, community organizations and individuals, we have determined that the proposed project will not have a significant impact on the environment, and an Environmental Impact Statement is not required.
- 4. Reasons Supporting Determination - Reasons and conditions supporting the determination are based on the following criteria. The proposed project will not:
 - affect any rare or endangered flora or fauna;
 - destroy any archaeological, historical or cultural resources;
 - displace any families or commercial establishments;
 - degrade environmental quality;
 - conflict with the State's environmental policies and goals expressed in Chapter 344, HRS.
- 5. Contact Person -

Dear Mr. Choy:

Subject:

Environmental Assessment for the Proposed Sale of

Government Remnants, Waiau, Oahu,

TMK: 9-8-20: 71, 95

Enclosed herein is a copy of an Environmental Assessment for the proposed sale of Government remnants, Waiau, Oahu, Tax Map Key 9-8-20: 71 and 95. We propose to sell seven (7) remnant government lots to the abutting property owners in this area.

We have found that the potential impacts resulting from the utilization of this area have been identified and adequately analyzed and mitigated. A full environmental impact statement therefore, is not warranted and a negative declaration is filed in accordance with Chapter 343, Hawaii Revised Statutes.

Should you have any concerns, please contact Cecil Santos of our Land Management Division at extension 8-3262.

Yours tru,

Dr. Bruce Anderson, Acting Director Office of Environmental Quality Control 465 S. King Street, Room 104 Honolulu, HI 96814

Dear Dr. Anderson:

SUBJECT: WAILUKU-KAHULUI WWRF ADDITIONS AND MODIFICATIONS NEGATIVE DECLARATION

The Department of Public Works, County of Maui, has reviewed the attached Environmental Assessment for the Wailuku-Kahului WWRF Additions and Modifications, and has determined there are no significant impacts. Therefore, we have found this document to be a negative declaration.

If there are any questions concerning the environmental assessment, please contact Mr. David Wissmar of our Wastewater Reclamation Division at 243-7417.

Aivin K. Fukunaga

Director of Public Works

DW:ym(WM91148)

attachs.

c: Mark Bluestein, Brown and Caldwell

PROJECT DESCRIPTION

The Wailuku-Kahului Wastewater Reclamation Facility is an existing plant rated at 6.8 million gallons a day, average dry weather flow. The plant is located near the Kahului Airport and serves the communities of Wailuku, Kahului, Spreckelsville, Paia, Kuau, Paukukalo, and portions of Waiehu. The plant site occupies a total of 18.76 acres under Governor's Executive Order 3006 (TMK: (2) 3-8-01:188).

The proposed additions and modifications will increase the plant capacity to 7.9 million gallons per day, average dry weather flow. The proposed work will also improve reliability, safety and the energy efficiency of the plant. Besides general modification to existing facilities, there will be additions of a new clarifier, effluent injection well, sludge holding tank, and dewatering centrifuge.

Mr. and Mrs. J. Grobe 46-394 Haiku Plantation Drive Kaneohe, Hawaii 96744

Dear Mr. and Mrs. Grobe:

NOTICE OF ACCEPTANCE AND ENVIRONMENTAL DETERMINATION
Conservation District Use Application
for Property Consolidation, Resubdivision and
Single Family Residence, Tantalus, Oahu

This acknowledges the receipt and acceptance for processing your application for property consolidation, resubdivision and single family residence, Tantalus, Oahu.

According to your information, you propose to consolidate portions of grants udentified as Nos. 110, 111 and 473, resubdivide them into two legal lots with a single family residence established on parcel A.

After reviewing the application, we find that:

- 1. The proposed use is a conditional use within the Resource subzone of the Conservation District according to Administrative Rules, Title 13, Chapter 2, as amended;
- 2. A public hearing pursuant to Section 183-41, <u>Hawaii</u>

 <u>Revised Statutes</u> (HRS), as amended, will be required in that the proposed use includes a subdivision.
- 3. In conformance with Title 11, Chapter 200, of the Administrative Rules, a negative declaration was determined for the proposed action.

Doc. No.: 9471E

Mr. & Mrs. Grobe

As the applicant, please be advised that it will be your responsibility to comply with the provisions of Section 205A-29(b), Hawaii Revised Statutes, relating to Interim Coastal Zone Management (Special Management Area) requirements.

-2-

Negative action as required by law, on your application by the Board of Land and Natural Resources can be expected should you fail to obtain from the County thirty (30) days prior to the 180-day expiration date, as noted on the first page of this notice, one of the following:

- A determination that the proposed development is outside the Special Management Area (SMA);
- 2. A determination that the proposed development is exempt from the provisions of the county ordinance and/or regulation specific to Section 205A-29(b), HRS; or
- A Special Management Area (SMA) permit for the proposed development.

Pending action on your application by the Land Board in the near future, your cooperation and early response to the matters presented herein will be appreciated. Should you have any questions, feel free to contact our Office of Conservation and Environmental Affairs staff at 548-7837.

y truly yours,

WILLIAM W. FATY

FROM:

WILLIAM W. PATY, Chairperson

Board of Land and Natural Resources

SUBJECT:

Environmental Assessment for Helen C. Texeira for

Access and Utility Easement Over a Portion of

Government Land at Pohakuhaku-Kemau, Hamakua, Hawaii

Copies of the above-cited assessment were forwarded for our review and comments. Details are as follows:

1. Helen C. Texeira

Direct sale of access and utility easement over and across State lands situate at Pohakuhaku-Kemau, Hamakua, Hawaii, TMK 3rd/4-3-06:04 and 16.

As owner of the underlying lands, we have reviewed said assessment, as requested. Please be advised that on the basis of the assessment, we find the proposals will have no adverse impact on the environment.

This constitutes our filing a Negative Declaration for the above-cited project.

Enclosed please find four copies of the Environmental Assessments (together with maps) for your consideration and action.
